Rationale

There is no legal or contractual duty on teachers, administrative staff or support staff to administer medication or supervise a pupil taking medication. It is a purely voluntary role.

At Red Hall Primary we take seriously our duty of care and consent to administer medication, subject to the conditions set out in this policy. This policy sets out general guidance but each case will be dealt with on its own merits. This policy applies to all children attending Red Hall Primary School from our 2 year old provision to Year 6.

Definitions

Short Term Medication – This is prescription medication, which only needs to be taken for a few days to allow the pupil to return to school e.g. a course of antibiotics. The administration of this medication should be for a couple of weeks or less. A medication form, will need to be completed.

Long Term Medication – This is medication required to manage a long-term medical need, i.e. asthma, epilepsy etc. where the medication will be required for extended periods. A Healthcare Plan should be completed.

School Procedure

Request to Administer Short/Long Term Medication and General Care

- The school will only administer medication where a medication form has been completed by the parent(s)/guardian(s) of a pupil. No medication will be given unless this form is completed. Medication must be prescribed by a doctor, and must have the medical instructions, including dosage, attached to the medication.
- **No pupils should have in their possession any form of medication, other than inhalers or such medicine as is described in their 'request to administer medication' form, and 'healthcare plan'. This includes prescribed and non-prescribed medication, including cough sweets, throat lozenges, and cold remedies.**
- **If a child simply turns up with medication it will not be administered and the parent will be informed. In certain cases the child may need to be sent home. This will include if it is the first 24 hours of taking antibiotic or a new medicine in case of allergic reaction.**
- All medications will be stored in the office medication cabinet or staffroom fridge as appropriate. However, parents should be encouraged to ask their doctor or dentist, where possible to prescribe medication in dose frequencies which enable it to be taken outside school hours. (Guidelines: There is no problem when medication is prescribed for three times per day, as doses may be taken before school, after school and at bedtime. Four doses would include a midday requirement which would need the request form to be completed.)
- Parents are encouraged to come into school and administer the medication themselves.
- Children who have extreme allergic reactions to some food i.e. nuts, fish, or dairy products – ANAPHYLAXIS – will have their EPI-PEN in class and/or have one in the office. If an attack does take place then an ambulance should be called immediately

and parents contacted, and a trained member of staff may administer one or two doses as needed.

- If pupils refuse to take medication, then the parents should be informed immediately and if necessary the emergency services called.
- Staff should always take normal precautions to avoid infection and must follow basic hygiene procedures. Protective gloves should be worn when dealing with spillages of blood or other body fluids. Gloves can be obtained from the First Aid cupboard in the staff room.
- Staff should not dispose of medicines. Parents should collect medicines held at school at the end of each term and be responsible for ensuring that any medication in school is not out of date. They should also be responsible for changing empty medicine containers.
- Teaching staff should be given a list detailing names, condition and medication of children with medical needs in each class. **This list should be discussed with classroom assistants, lunchtime supervisors and students involved with the class.**

Assessment of Request

Following receipt of a medication form the office staff will assess the nature of the request and whether or not they are willing to administer the medication. The Headteacher will also identify whether staff are competent to administer the required medication.

(Staff are deemed competent to administer medication in tablet form orally or as medicine orally but must have received training in any medical techniques required, e.g. use of EPI-PEN for anaphylaxis.)

Health Care Plans and Forms

A medication form must be completed where a course of medication is needed to be administered for up to two weeks to enable a child to return to school.

A Health Care Plan – Where a child needs medication for a long-term medical. Each care plan will be reviewed annually or when necessary.

Prescription Medication

The school will only accept prescription medication for a pupil when:

- The medication has been brought into school by an adult with parental responsibility for the child.
- The medication is in an appropriate prescription pack that is clearly and correctly labelled.
- The pharmacist's name and details are clearly indicated.
- The pupil's name and address are clearly indicated.
- The container has not been tampered or interfered with in any way.
- The exact dosage regime is specified.
- The dosage makes it clear that the medication must be taken during school hours i.e. 'four times a day', 'before / after meals', 'when necessary' etc.
- The adult with parental responsibility signs a consent form enabling staff to administer medication to their child. The details on the form must match the details in the medication record and the prescription.
- Children cannot be admitted to school until antibiotics have been given for 24hrs in case of an allergic reaction.

If the school is unsure of the source or purpose of the medication staff should refuse to accept it.

Non-Prescription Medication

The school will not accept non-prescription medication. If needed, parents/guardians will be asked to come into school to administer non-prescription medication to their child.

Application of Nappy creams

If it is essential to apply nappy cream to children in our 2 year old setting, we would request that you fill in a medicine form detailing this. These creams do not have to be prescribed but must be provided by parents / carers.

Recording Procedure

When a medication has been accepted:

- The child's name, date of birth, address and parents contact details should be clearly recorded.
- It must be recorded in the medication register, noting the name of the medication, the quantity supplied and by whom.
- Each dose administered must be recorded.

Storage Procedure

All medications will be stored in the office medication cabinet or staff room fridge as appropriate. Inhalers are to be kept in the child's classroom cupboard and must be easily accessible.

Disposal Procedure

Each half term, ALL medication will be signed back to the parent. If this is not collected within the prescribed time, it will be disposed of at a local pharmacy. A communication will be sent out to remind parents of this.

Emergency Treatment

- In an emergency an ambulance should be called.
- If it is not an emergency the parents should be contacted first and offered the option of calling an ambulance or of taking their child to hospital themselves.
- If the parents are not available an ambulance will be called and a member of staff should accompany the child and should remain at the hospital until a parent arrives.
- Generally staff should not take pupils to hospital in their own car. However, in an emergency it may be the best course of action. In those circumstances the member of staff should be accompanied by another adult and have appropriate public liability vehicle insurance.

Staff Liability

There is no legal requirement on staff in schools to administer medication to pupils but there are a number of legislative requirements whose effect, in practice, has resulted in school staff administering medication.

Primarily there is a legal requirement to educate children. Consequently schools need to make arrangements to allow children with medical needs to attend school where practicable. Once in school pupils are owed a 'duty of care' and staff also act in 'loco parentis'.

The prime responsibility for a child's health however lies with the parents.
